- Significant relevant experience in environmental and water management related roles.
- Minimum of 5 years working in industry either prior to or post studies. Preference is for experience in industries or businesses with high performing environmental performance in a dynamic and moderate-high hazard work environment. Previous mining experience would be valuable but is not essential.
- Prior experience with supervising water management is essential.
- Experience in supervisory or management positions is desirable.
- A demonstrable understanding of the legal requirements for effective environmental and water management. Montana experience would be advantageous but not essential.
- Very good communicator verbally and in writing.
- Excellent skills in MS Office Suite.
- Demonstrable delivery of positive environmental performance outcomes.
- Able to identify a desirable vision of high performing environmental and water management systems and support a team of operators towards that objective.

Company Property

For this position, the company will supply the following:

- Company laptop.
- Company monitor.
- PPE commensurate with any assigned task.
- Access via key or code to Company site, project and buildings.
